Product portfolio
Kurgan meat processing plant, one of the oldest manufacturers in Kurgan region and the country in general, was the business merger of the Danish export hog-killing plant Bruehl&Tegersen, the British company Union, which produced bacon and sausage, and the sausage manufacturing plant owned by the Russian merchant Sorokin and the Shelyagin brothers.
Urals Agricultural Group

Since 2005 Kurgan meat processing plant has been essential part of the Urals Agricultural Group, a large business engaged in crop production, pig farming and meat processing. This vertically integrated holding structure allows to precisely control each production stage and minimize production costs.

* (limited liability company under the jurisdiction of the Russian Federation)
** (open joint stock company under the jurisdiction of the Russian Federation)
We are fully aware of the fact that pig food accounts for about 70% of pork production costs, in the meantime being the most essential factor influencing pork quality.

This is why we grow our own crops to determine that our pigs get the best food we can offer them.

We refine our professionalism to perfection, using world-class equipment, soil quality preservation technologies, and collaborating with experts.
Since 2013 Kurgan meat processing plant has been supplied with premium-quality pork from Kurgan pig farm, an entirely self-sufficient enterprise with efficient pig breeding and raising technologies.

It is fresh top-quality pork that enriches our products and makes them taste like more.

Climate control and feeding systems provided by SCHAUER.

Breeding stock provided by PIC.

200 PIGS DELIVERED TO MEAT PROCESSING PLANT WEEKLY

1000 TONS OF HIGH-QUALITY MEAT ANNUALLY
Kurgan plant is currently among Top 5 meat processing companies in Russia.

In 2014 the canning department underwent total reconstruction. Since then Kurgan meat processing plant has been one of the few Russian enterprises that boasts cutting-edge Italian, French and German equipment.

Our can-making department manufactures tin cans for stewed products. Cans are made of tinplates, manufactured specially for food industry purposes by Iron and Steel Plant in Magnitogorsk (Magnitogorskiy Metallurgicheskiy Kombinat). All tinplates are covered with can enamel suitable for food industry use in a coating machine to become the most reliable meat container in the world. Just think of it, these airtight tin containers can successfully survive in a steaming hot African desert and preserve all the goodness of savoury meats for three years since manufacture date.

### Reference information:

Packaging weight (polyethylene multipack + corrugated fiberboard base layer) = 0.070 kg
Quality standards

Each stage of our production process meets the requirements of the European Union and the Russian Federation standards on food quality and safety.

Our quality management standards are founded on FSSC 22000 guidelines.

Our meat processing plant owns a certified laboratory, which controls every aspect of the production process, supplied ingredients and output products on a daily basis.

All finished goods are kept in stock for 11 days or longer before transportation.

Only safe high-quality products are delivered to our customers.
Numerous medals and diplomas awarded to our products speak for themselves and incorporate a multitude of positive reviews from food industry experts. Our products earned their high-ranking positions in Top 100 Russian Products, and won a number of quality contests organized by Russian Federal Ministry of Agriculture, and the Test Purchase magazine (Kontrolnaya zakupka). Each year Kurgan meat processing plant successfully participates in major international, federal and regional exhibitions.
IMPORTERS FROM 10 COUNTRIES

DISTRIBUTED TO 66 REGIONS OF RUSSIA

Sales geography
KMK
Our distribution network embraces all Russian regions. Further still, our business strategy aims at expanding our sales territory continuously and maintaining our distributors' positions in all regions of our country.
Why choose us?

Consistent approach to product pricing
We set the same prices on our products regardless of the region or delivery address.

Increasing productivity
Our advanced high-production equipment guarantees that your order will be ready for shipping in due course and quantity.

Value-for-money products
We work hard to offer each target group the best possible options in each price segment. You will find a great product for every price and store, be it a corner shop or a mall.

Win-win strategy that works
Our main principle is to satisfy the needs of our partners, suppliers, customers and employees, pure and simple.

Open door policy
Welcome to Kurgan meat processing plant! You may visit any department any time you wish to witness each and every step of production. We are most certain that you will love what you see (and try).

Last but not least, it is taste that matters
We painstakingly work on our recipes in close collaboration with the food industry experts from the Federal Scientific Research Institute of Meat Industry named after V.M. Gorbatov.

Welcome to Russia! Welcome to Kurgan!
Choose natural taste
